Australian General Practice Training

We offer general practitioner training through a federally-funded program. The curriculum is set by the two general practice colleges, The Royal Australian College of General Practitioners (RACGP) and the Australian College of Rural and Remote Medicine (ACRRM).

We currently have over 600 registrars training on the program which is based on an apprenticeship model, ie training takes place in accredited training facilities with additional teaching provided by our experienced medical educators.

Rural Generalist Program

ACRRM and RACGP registrars apply to a specific pathway to become a Rural Generalist. You will have the opportunity to establish a supported career pathway and additional time to consolidate your learning and gain procedural skills.

Training as a Rural Generalist will give you the specialist skills to practice primary healthcare in your chosen community.

RACGP Practice Experience Program (PEP)

We administer this self-directed RACGP program aimed at doctors who are currently working in GP clinics, but are not vocationally registered.

Participants continue to work in their practices while completing a number of learning units. After six – 18 months they are eligible to sit their RACGP exams to become a Fellowed doctor.

WHO IS MCCC?

With knowledge, experience and a love of teaching, our GP supervisors and medical educators will guide you through your training to achieve Fellowship.

Their mentorship will make you a better doctor. Not only will you learn from the best educationalists, we also have a dedicated, friendly program team to help you with the administration requirements of your training.

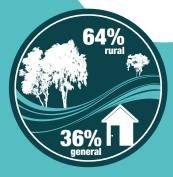

Our medical educators continually look at new initiatives in education and you will benefit from their extensive knowledge.

With a choice of diverse placements across our region, which covers two-thirds of Victoria, there's a training facility to suit everyone - regional hospitals, rural practices or Aboriginal and Torres Strait Islander Health services.

See our pathway cards for the different options to achieve Fellowship.

Responding to community needs

Researching, understanding and responding to the health needs of our diverse communities

TRAINING PLACEMENTS

WHY TRAIN WITH US?

- Experience education which focuses on individual learning needs, aimed at attaining your Fellowship
- ▶ Challenge yourself with a choice of over 330 diverse, accredited placements across rural, regional or metro settings
- Attain clinical diversity in rural and regional practices, healthcare services, regional hospitals or multi-disciplinary clinics
- ▶ Choose from a variety of Aboriginal and Torres Strait Islander posts with complex presentations
- ▶ Work with our superior online eLearning platform, with a complete range of quality-controlled resources.

Working and learning together

Supporting GP registrars and their supervisors

OUR EDUCATION STRATEGY

We deliver a high-quality, nationally accredited education program that is innovative, evidencebased and focused on your training needs. You will experience:

- A wide breadth of general practice exposure, advanced training and procedural skills
- Highly-trained, passionate and experienced educators, training advisors and program staff
- Over 850 dedicated GP supervisors for oneon-one, in-practice teaching and guidance
- High-quality, relevant content designed for optimum learning
- ▶ Face-to-face teaching with dedicated workshop days and interactive online webinars
- Regular opportunities to network and debrief with your peers.

The program employs a diverse range of learning and teaching modes including workplace based learning and supervision, workshops, small group webinars, core eLearning activities and additional resources.

Clear links between in-practice and out-ofpractice teaching will maximise your learning, allowing for greater opportunities to practice and consolidate your knowledge and skills in the workplace.

Our individual training plans are supported by dedicated training advisors and operational staff to assist you with your individual learning needs. We can also help you if you wish to develop and excel in areas of special interest training.

We have a specific team, Pastoral and Learning Support (PALS), who can provide unique support from both a well-being and an education perspective. You will also receive guidance from our registrar liaison team who provide registrar advocacy and assistance.

If you have an interest in working in Aboriginal and Torres Strait Islander Health, see our wide range of accredited speciality posts.

Work beside a dedicated team of medical educators, cultural educators and cultural mentors who will support and guide you through complex and diverse clinical presentations. You'll experience the satisfaction of working in this hugely rewarding area, based in some of the most scenic locations in Victoria.

Building effective partnerships

Partnering with leading health organisations to deliver hands-on, multi-faceted training

WHY GO RURAL?

I was pleased to join a very friendly and supportive environment at Swan Hill Medical Group, in a town that loves the novelty of a new face.

Although it was initially a daunting option for GPT1 and GPT2, looking back I'm grateful for having taken the challenge.

From a clinical perspective the work environment picked up as soon as I was prepared to get going. I chose my pace and I chose to start slow. As I felt comfortable, I increased my patient load and slowed down again when I needed.

The clinical environment involved a good mix of paediatrics through to geriatrics. There was great supervision, with teaching guided by the areas I wished to cover and blocked out on the roster.

In my second week I started doing excisions and later started inserting and removing Implanons. From a non-clinical perspective the clinic is very understanding of personal commitments and flexible with the roster.

Swan Hill has many local sights to explore, some of my favourites being the Silo Art Trail, the salt flats at Lake Tyrrell and crossing the border to NSW.

Dr Shiju Mammen, former MCCC Registrar Medical Educator

Training the next generation of GPs for our community
